EXPERIENCE

Automation & Integration Developer

May 2026 – Present

PEC (Professional Engineering Consultants), Wichita, KS

- Build Revit add-ins and Autodesk Platform Services automations in C#/.NET that streamline model collaboration, worksharing, and project delivery workflows for engineering teams.
- Extended a cloud worksharing pipeline spanning Design Automation for Revit, an Azure-hosted backend, and an ACC browser integration, and automated project setup in Autodesk Forma.
- Replaced a third-party BIM analytics subscription with an in-house integration, delivering five-figure annual savings.
- Built identity and business-process integrations in TypeScript/JavaScript, including a Forma–Microsoft Entra ID user sync and HR/operations automations, translating other teams' needs into working integrations.
- Developed internal analytics dashboards tracking automation usage, reliability, and cost to show the business what its automation delivers.

Software Engineer Co-Op

November 2025 – May 2026

Flint Hills Resources (Koch), Wichita, KS

- Analyzed and modernized legacy .NET Framework applications serving 100+ internal users across multiple accounting platforms.
- Built an EventBus publisher and contributed to Node.js 18 → 22 AWS Lambda upgrades on the .NET platform team.
- Developed a .NET Blueprint Template to standardize project initialization across the team, reducing onboarding time.
- Configured Docker devcontainers with enterprise PKI certificates so packages install securely behind corporate firewall policy; migrated NuGet logging dependencies across multiple services.

Software Engineer Intern

March 2024 – November 2025

Integra Technologies, Wichita, KS

- Designed and implemented company-wide ERP modules in Oracle Forms and Oracle APEX, including printing/reporting and finance and engineering workflows.
- Wrote PL/SQL to query, manipulate, and secure enterprise Oracle databases supporting 200+ internal users.
- Resolved 10+ UI and database requests weekly, reducing issue backlog and improving turnaround time.

PROJECTS

DineSense – Nutrition-Aware Dining App

[dinesense.app](#)

Tech: Swift, Supabase (PostgreSQL), HTML/CSS/JavaScript

- Built a native iOS app on a Supabase backend that carries a user's remaining daily nutrition budget into restaurant ordering; currently in an invite-only pilot.
- Designed a flow to compare up to three menu items with estimated nutrition ranges and log the choice back to daily totals; hand-built the marketing site.

ExpenseTracker – Full-Stack Web App

[GitHub](#)

Tech: .NET 8, Entity Framework Core, PostgreSQL, React 19, TypeScript, TanStack Query, Docker

- Built a layered ASP.NET Core Web API with FluentValidation and AutoMapper, using EF Core migrations against a Dockerized PostgreSQL database.
- Built a typed React client with TanStack Query and Tailwind CSS for server-state caching and data fetching.

Carbon Weighted Traffic Control – Senior Capstone

Wichita State

Tech: Python, SUMO, Flask, Jupyter, Docker, CARLA

- Integrated EPA vehicle test data (2008–2025) with SUMO traffic simulation to model urban emissions under different traffic-light strategies.
- Built a Flask dashboard visualizing emissions, signal states, and lane occupancy; trained an SVM to classify vehicle types.

TECHNICAL SKILLS

Languages: C#, TypeScript, JavaScript, Python, Swift, SQL (PL/SQL, PostgreSQL), C++

Frameworks: .NET / ASP.NET Core, Entity Framework Core, Node.js, React, React Native, Flask

Cloud & APIs: Azure, AWS Lambda, Autodesk Platform Services (ACC, Design Automation, Forma), Revit API, Microsoft Entra ID, REST, OAuth 2.0

Data & Tools: PostgreSQL / Supabase, Oracle, SQLite, Git / GitHub, Azure DevOps, Docker, Linux

EDUCATION

Bachelor of Science, Computer Science · Minor in Mathematics

May 2026

Wichita State University, Wichita, KS

Associate of Science, Liberal Arts

May 2023

Butler Community College, Wichita, KS
