EDUCATION

Bachelor of Science, Computer Science

Wichita State University, Wichita, KS

August 2023 – May 2026

Associate of Science, Liberal Arts

Butler Community College, Wichita, KS

August 2021 – May 2023

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, C++, PL/SQL, .NET (C#)

Frameworks & Libraries: React, React Native, Expo, Node.js

Databases: Supabase (PostgreSQL), Firebase, MongoDB, Oracle

Tools & Platforms: GitHub, Azure DevOps, Docker, Visual Studio Code, Linux, Oracle APEX

RELEVANT EXPERIENCE

Software Engineer Co-Op

November 2025 – Current

Flint Hills Resources | Koch, Wichita, KS

- Analyze and modernize legacy .NET Framework applications serving 100+ internal users across multiple accounting platforms.
- Contributed to Node.js Lambda function upgrades and an EventBus publisher on the .NET platform team.
- Developed a .NET Blueprint Template to standardize project initialization across the team, reducing onboarding time.
- Migrated NuGet logging platform dependencies and updated library integrations across multiple services.

Software Engineer Intern

March 2024 – November 2025

Integra Technologies, Wichita, KS

- Designed and implemented ERP system modules using Oracle Forms and Oracle APEX for cross-team workflows.
- Used PL/SQL to manipulate and query enterprise databases, supporting 200+ internal users.
- Resolved 10+ UI and database requests weekly, reducing issue backlog and improving turnaround time.

RELEVANT PROJECTS

Nova – Fitness RPG App

Tech: React Native, Expo, Supabase, TypeScript

- Leading full-stack development of a mobile fitness RPG with character progression, XP systems, and gear unlocks across four workout paths.
- Built a competitive event system (Grand Trials) with photo-verified anti-cheat, solo and guild formats, and leaderboard ranking.
- Architected a Supabase backend with Edge Functions, badge/achievement schema, and a Titles system with 35 entries across six rarity tiers.
- Designed and implemented a comprehensive UI system (Neo-Pixel Brutalism / Stellar Geometry) with a warm brutalist palette and pixel art assets.

NutriForge – AI Meal Prep App

Tech: React Native, Expo, Supabase, TypeScript

- Building an AI-powered meal prep and grocery optimization app targeting the fitness audience.
- Designed user flows for personalized meal planning, ingredient tracking, and smart grocery list generation.
